

EED: Eye Exam for Patients with Diabetes

Description

- This measure assesses the percentage of members 18–75 years of age with diabetes (types 1 and 2) who had a retinal eye exam.
- A retinal or dilated eye exam by an eye care professional (optometrist or ophthalmologist) in the measurement year.
 - A negative retinal or dilated eye exam (negative for retinopathy) by an eye care professional in the year prior to the measurement year.

Measure population

- Patients can be included in this measure by meeting one of the two criteria in the measurement year or in the year before the measurement year.
 - Encounter data: At least two diagnoses of diabetes on different dates of service.
 - Pharmacy data: dispensed insulin or hypoglycemics/antihyperglycemics AND have at least one diagnosis of diabetes.

Medications

Alpha-glucosidase inhibitors	Amylin analogs	Antidiabetic combinations	Biguanides
Insulin	Meglitinides	Sulfonylureas	Thiazolidinediones
GLP I agonists	DDp-4 inhibitors	SGLT2 inhibitor	

Measure strategies and tips

- If your practice uses EMRs, have flags or reminders set in the system to alert your staff when a patient’s screenings are due.
- Send appointment reminders and call members to remind them of upcoming appointments and necessary screenings.
- Follow up on lab test results, eye exam results or any specialist referral and document on your chart.
- Refer members to the network of eye care providers for their annual diabetic eye exam.
- Remember to include the applicable CAT II reporting code as listed above on the claim form to help reduce the burden of HEDIS medical record review.

- If using an EMR system, consider electronic data sharing with the health plan to capture all coded elements. Contact your provider contact or health plan contact for additional details and questions.

Exclusion criteria

- Bilateral absence of eyes any time during the member's history
- Bilateral eye enucleation any time during the member's history
- Use of hospice services
- Members receiving palliative care during the measurement year
- Death during the measurement period
- Members 66 or over with frailty or advanced illness
